

BTL

The 100% extreme muscle contraction of HI-EMT technology can trigger a large amount of lipolysis, and fatty acids are decomposed from triglycerides and accumulated in fat cells. Ems sculpt is based on High-Intensity Focused Electro-Magnetic (HIFEM) field technology which has the ability to induce supramaximal muscle contractions. The fatty acid concentration is too high, leading to the apoptosis of fat cells, which are excreted by the body's normal metabolism within a few weeks. Therefore, the slimming beauty instrument can strengthen muscles and reduce fat at the same time.

Advantage

1. Offer the latest in cutting edge body contouring treatment technology
2. Just turn on and let the system do the work for you
3. Simple and easy to use operation
4. Zero consumables
5. Non-invasive, no downtime, no side effects and pain-free
6. Recommended treatment cost is \$800 (single visit)
7. Comes with 2 applicators for stomach, buttocks, arms, and thighs operation interface
