

# Cryo + Hifem 2 in 1

HIFEM technology combines radio frequency, using patented electrodes to mix radio frequency thermal energy with HIFEM. The Cryolipolysis machine is a new, non-invasive, safe method that can gently and effectively reduce target fat, so that the body loses fat significantly and naturally.

## Advantage

1. Simultaneous application of RF and Hi-emtR enhances the fat;
2. Solve cellulite problems caused by cellulite and cellulite;
3. The treatments were safe and comfortable;
4. Promote metabolism and blood circulation.
