

EMS Hifem 4 Handles With Cushion

EMS sculpt device designed for aesthetic purpose, having 4 applicators with higher intensity. It's cutting-edge technology in non-invasive body contouring, as it not only BURNS FAT, but also BUILDS MUSCLE.

Ergonomic design, designed according to the human body curve, comfortable support.

Slightly low front and high back design, the hips are lifted up, the legs are comfortable and the inclined surface is comfortable.

Advantage

1. Compared to 700W of the machine in market, the power of this device is 5000W. The full energy of ordinary machines is only equivalent to the intensity of our 3rd level.
2. There are 10 levels of energy to be adjusted, 7 kinds of frequency wave forms, 5 body parts can be operated, the lowest frequency is 4.46 Tesla and the highest is 13.46 Tesla.
3. Muscle gain is synchronized with fat burning, and the safety factor is high. Using it for 30 minutes equals to the effect of 5.5 hours' exercise.
4. The technology is continuously improved in the long R&D period, and the instrument performance is stable with few after-sales. All kinds of certificates are complete, and the safety is guaranteed.
