7D HIFU MMFU machine

Technical Specifications

Technology: 7D HIFU MMFU technology

Handpiece: 2 handles

Power: 1000W

Frequency: 2MHz / 4MHz/ 7Mhz

Power : 0.1-3J adjustable

Cartridges: 1.5mm/2.0mm/3.0mm/4.5mm/6.0mm/9mm/13mm

Tranducer: Korean import brushless tranducers

Interface: 10'4 Touch Screen

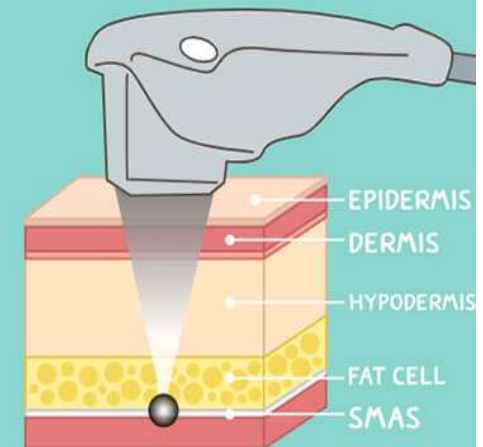

Length: 5 -25mm

Dimension: 50 * 52 * 131cm

7D HIFU working theory

HIGH-INTENSITY
FOCUSED ULTRASOUND

7D HIFU Technology

7D HIFU machine is the latest technology for face lifting, wrinkle removal, and body sculpting. The technology is first developed as a product named Ultraformer III. 7D HIFU, use MMFU(Macro & Micro focused ultrasound) technology, the transducer generates heat in the focus area.

Advantages:

- 10.4 true color touch screen, easy operation
- MMFU=Micro and Macro Focused Ultrasound, latest technology for face and body.
- Dual handles and 7 cartridges(face + eye + body)
- 7 cartridges, 20,000 shots for face cartridge and 30,000 shots for body cartridges
- Special design 2.0mm cartridge for eye surrounding treatment
- Non-surgical, non-invasive and no down time
- Cartridges: 1.5mm/2.0mm/3.0mm/4.5mm/6.0mm/9mm/13mm
- 150HZ high frequency, stronger muscle stimulation
- 7D HIFU is the latest HIFU technology, painless HIFU treatments
- Non-invasive, Non surgical, no downtime, and pain free treatment
